

23. An apparatus for digitally recording motion pictures, comprising:

- a housing sized to be portable for use by an individual;
- a motion picture camera mounted in the housing;
- means, mounted in the housing, for providing a sequence of digital still images from the motion picture camera;
- a digital computer-readable and writable random-access medium mounted in the housing and connected to receive and store the sequence of digital still images in a computer-readable file format; and
- an editing system, mounted in the housing, for defining a sequence of segments of at least the sequences of digital still images and for reading and outputting at least a portion of the sequence of digital still images from the digital computer-readable and writable random-access medium according to the defined sequence of segments.

#### REMARKS

Please enter the foregoing amendments. The cancellation of claims 2, 4-8, 10-22 and 24-44 significantly reduces the issues for appeal. A typographical error was also identified in claim 23 and its correction is respectfully requested.

Respectfully submitted,
